EDUCATION

University of Waterloo

Bachelor of Computer Science, AI Specialization

Concepts: Data Structures & Algorithms, Distributed Systems, Information Retrieval, Machine Learning, Natural Language Processing

Waterloo, ON

Sep. 2022 – April 2027

SKILLS

Languages: Java, TypeScript/JavaScript, C++/C, Python, Golang, SQL, Bash, HTML/CSS

Frameworks and Technologies: Spring Boot, Django, Jest, JUnit, Next.js, React, MongoDB, MySQL, PostgreSQL, Node.js, Express.js

Developer Tools and DevOps: GCP, AWS, OpenSearch, Redis, Databricks, Kafka, Docker, Datadog, Terraform, Kubernetes, Git, Jira, Cursor

EXPERIENCE

Software Engineer Intern

Grammarly (formerly GPTZero)

Jan. 2026 – Aug. 2026

Toronto, ON

★ Outstanding Evaluation

- Led **GPTZero Investigations** and co-authored the **EY**, **KPMG**, and **PwC investigations**, driving global coverage in Financial Times, Bloomberg, Forbes, and Telegraph; credited in **Grammarly's acquisition of GPTZero**
- Owned an **OpenSearch information retrieval** system; built the **evaluation harness**, **load tests**, and **observability** dashboards
- Created the RFC, validated it via **Databricks** analysis and owned an end-to-end **citation caching system**; saving **~\$54K/year** and optimized throughput and cut flakiness in detecting **LLM hallucinations**
- Architected a resilient, idempotent pipeline on **AWS Batch** and **SQS** with **PostgreSQL** state tracking, processing **50K+ papers**
- Resolved a critical **Kubernetes CrashLoopBackOff** crashing live backend pods, tracing it to a third-party library defect

Backend Software Engineer Intern

Carta

May 2025 – Aug. 2025

Waterloo, ON

★ Outstanding Evaluation

- Architected the design document, aligned with stakeholders, and developed **Eligibility Checks** from **0->1** to surface expense routing, saving over **600+ hours** annually in manual triaging
- Resolved **critical concurrency bugs** and implemented **distributed locking** for end-to-end IMAD/OMAD integration
- Built an AI Wire Spreadsheet Extractor with **agentic flows** to populate wire instructions, cutting **5000+ manual hours per year**

Software Engineer Intern

Ford Pro

Sep. 2024 – Dec. 2024

Dearborn, MI

★ Outstanding Evaluation

- Architected one of **Pro Tech's top 5 milestones**, vehicle enrollment flow, processing **5M+ annual transactions** and **driving \$10M+**
- Introduced **composite monitoring** across **100+ teams**, reducing MTTR on **5000+ annual incidents**

Software Developer Intern

Ford Motor Company of Canada

Jan. 2024 – Apr. 2024

Oakville, ON

★ Outstanding Evaluation

- Developed KPI reports in **TypeScript/NextJS** and optimized **load times by 90%** via state management in **Zustand**

Systems Software Developer Intern

Ford Motor Company of Canada

May 2023 – Aug. 2023

Ottawa, ON

★ Outstanding Evaluation

- Owned **KPIs** to evaluate metrics on a **next-gen ECU** and set up Ford Ottawa's first lab installation

COMMUNITY

🔗 **Project Lead @ UW Blueprint** - Directed a Discord integration for BobaTalks, a student career community of **13K+ members**

Previously: Software Executive @ Google Developers Group; Project Developer @ UW Blueprint; Class Profile Developer @ UW CSC

PROJECTS

RPG | Python, OpenAI, Pydantic, Rich, and Pytest

- Built an AI role-playing game that generates NPC dialogue, evaluates **free-form interactions**, and **maintains world state** for **context-aware branching** narratives.

Zippy | C++, Python, Docker

- Greater than **2:1 file compression ratio** utilizing concurrent parallel processing algorithms shipped with **Docker & buildx**
